

## IN THE SPECIFICATION

Please replace the paragraph beginning at page 4, line 1, with:

In the above described preferred embodiments the member 21 may be rubber, latex, silicone or any other suitable synthetic elastomeric material. In the above embodiment the member 21 is of a domed configuration. The member 21 is domed so as to extend away from the mould 15 (see Figs. 1 and 4). ~~However,~~ In an alternative embodiment, the member 21 may be formed of elastic foil.
